PAP-GM504P SD-WAN Gateway

Product Specification

Product Overview：

PAP-GM504P is a high-performance, multi-port Gigabit enterprise SD-WAN gateway developed by Panabit. Designed for fast internet and SME branch interconnectivity, it offers easy management, stable SD-WAN, PoE power, and AC functionality, allowing direct AP management and easy installation for whole-building wireless coverage.

Product Features：

Easy Wireless Installation

Supports PoE for direct power supply to wireless APs, with an integrated AC for easy wireless network management. Compact design fits into low-voltage cabinets, saving space.

SD-WAN Networking

Supports Panabit's proprietary SD-WAN tunneling and traffic diversion, enabling cost-effective SD-WAN and standard network services.

All-in-One Gateway

Acts as a gateway with multiple connectivity options, offering multi-port LAN and supporting protocols such as DHCP, PPPoE, NAT, and DNS.

Remote Unified Management

Allows unified management via the Panabit gateway with multiple remote options, including private/public clouds and mobile apps, greatly boosting network management efficiency.

Specification：

Installation Options	Desktop, low-voltage cabinet, wall-mounted
WAN Port	1 x 10/100/1000Mbps adaptive Ethernet port
LAN Port	4 x 10/100/1000Mbps adaptive Ethernet port
PoE Output Power	60W
Internet Connection Methods	DHCP、PPPoE、Static IP
Standards & Protocols	IEEE802.3、TCP/IP、DHCP、ICMP、NAT、PPPoE、DNS、IEEE802.3at、IEEE802.3af
SD-WAN	Supports Panabit's high-speed, stable iWAN tunnel
Wireless Management	Manages up to 16 APs, 32 SSIDs, 1024 STAs
Network Management	Supports unified management via Panabit Cloud, etc.
Button	1 x Reset button
Indicators	Power, Link (per port), PoE
Power Supply	53.5V/1.2A external power adapter
Dimensions	190*100*28mm
Environmental	Operating Temperature: 0ºC to 45ºC Operating Humidity: 10% to 90% RH, non-condensing
